

# HIV affects us all

End the epidemic in the Black Community

- 1 out of 5 people do not know their HIV status.  
**KNOW YOUR STATUS.**
- Wear condoms each time - unprotected anal or vaginal sex is the riskiest means of transmission.
- STDs increase your chances of contracting HIV—make sure you get tested for STDs and HIV at least twice a year.
- If you inject drugs, do not share needles.

**we can stop  together**

To find other testing sites near you visit: [www.hivtest.org](http://www.hivtest.org)

**GET TESTED TODAY!**
